

Historical character visits. We bring excellent story-telling, costumed characters, and period objects to handle. Let us evoke the sights, sounds and smells of Shakespeare's world or Victorian England. We can provide workshops for key characters and periods studied at KS1 and 2.

Literary Character visits. We provide visits from characters from popular books. Be enslaved into eternal winter by Jadis, Queen of Narnia or learn gobblefunk with one of your favourite Roald Dahl characters. An excellent activity for World Book Day or just to add excitement to literature study. Contact us to discuss characters.

Story-telling workshop. Incorporating a variety of literacy and drama skills to take you on a journey through your own story, you will learn about the art of story-telling. Find your own story and develop it.

Play in a day. Create a polished performance in a day. Learn a variety of drama skills to raise confidence, improve speaking and listening, and build theatrical skills. A fun and focused session, culminating in an original performance piece. We can provide a theme, or it can link with school-based projects or targets.

Ruth is a theatre practitioner, writer & qualified teacher (PGCE MEd). She can also provide drama clubs, teacher CPD and literacy consultancy.

Sirius Astronomy

Space suit workshop. Explore why astronauts wear specialist clothing through hands-on experiments and have a chance to try on a replica of the Sokol Pressure Suit worn by Tim Peake.

Rockets and spacecraft workshop. What is a rocket? How does it work? How do we keep astronauts safe? This explosive workshop explores the science and engineering of spacecraft: how rockets lift off, how an orbit works, and why astronauts aren't burnt up on re-entry.

Solar system workshop. Ever wondered what a toilet roll has to do with the Solar System? Wonder no more. Let Paul take you through the history of the place we call home: our solar system.

Is there life on Mars? Investigate astrobiology and ask the question: Are we alone? Explore past current and future Mars missions, carry out experiments on simulated Martian soil and extract DNA to help decide what 'life' even means.

Astronomy workshop. Get hands-on with telescopes. Safely view the surface of the Sun using specialist equipment or explore the night sky with a range of telescopes. Sessions work better with smaller groups.

Paul is a Fellow of the Royal Astronomical Society & qualified teacher (FRAS PGCE). He can also provide teacher CPD and star parties.
